GROWING FOR THE GOOD

At Creative Dining Services we believe our air should be clean, our lakes should be pure, and our fields should be phosphate free; we believe in fair trade coffee, the fine art of composting, and leaving a smaller environmental footprint; we believe the food we eat should have fewer elements than the periodic table; we believe locally grown trumps flown.

We believe all of this.

But belief is nothing without action.

- We establish relationships with local farmers and suppliers
- We offer sustainable seafood programs
- We purchase Rainforest Alliance and Fair Trade certified coffees and teas
- We offer energy conservation management
- We offer biodegradable disposable products
- We offer recycling and conservation programs
- We offer Green Seal™ chemicals
- We offer paperless communications options

By deliberately increasing our knowledge and understanding of environmental practices we offer a continuously evolving menu of sustainable options to our partners.

Growing for the good. It's our belief. It's our responsibility.
